

PRESS RELEASE

Indonesia SIPF Attends 2025 KDIC Asia-Pacific Forum

Indonesia SIPF as the Organizer of Investor Protection Fund (PDPP) in Indonesia attended the event “2025 KDIC Asia-Pacific Forum: Building a Resilient Financial Future” on March 21, 2025 in Seoul, Korea organized by Korea Deposit Insurance Corporation (KDIC) and Korean Securities Association (KSA).

In addition to Indonesia SIPF, this forum was also attended by investor protection institutions (IPF) in the Asia Pacific region, such as Japan Investor Protection Fund (JIPF/Japan), Securities and Futures Investors Protection Center (SFIPC/Taiwan), Securities Exchanges Guarantee Corporation (SEGC/Australia), and Securities Investor Protection Corporation (SIPC/United States) who also attended virtually. Then, academics and financial industry experts also attended this forum, such as Professors from Hanyang University, DongGuk University, Ewha Womens University, representatives of Hana Bank and Mirae Asset Securities.

This forum is held with the aim of understanding the current state of investor protection in the financial services sector, reviewing the global standards of IPF institutions, and exploring future capital market developments. In addition, by bringing together representatives from various investor protection institutions in the Asia-Pacific region, as well as leading academics and financial industry experts, this forum is expected to be a forum for in-depth discussions and international cooperation.

On this occasion, Mr. Narotama Aryanto as the President Director of Indonesia SIPF was honored to be a panelist and resource person to deliver updates on conditions and issues of investor protection in the Indonesian capital market. Mr. Narotama said that in 2024 Indonesia SIPF had received a Fatwa from the National Sharia Council of the Indonesian Ulema Council (DSN-MUI) regarding the application of sharia principles in protecting investor assets in the capital market. This is Indonesia SIPF's commitment to support the development of the sharia capital market in Indonesia.

Mr. Narotama also said that Indonesia SIPF plans to review the maximum limit of compensation given to investors. Based on the current provisions, the maximum limit of investor compensation is IDR 200 million per investor or IDR 100 billion per incident in the custodian. Along with the development of the capital market and the amount of the Investor Protection Fund (DPP), it is possible for Indonesia SIPF to increase the maximum limit of compensation.

Beside that, as an implication of the implementation of Law Number 4 of 2023 concerning the Development and Strengthening of the Financial Sector and a follow-up to the Financial Services

Authority (OJK) Roadmap for 2023-2027, Indonesia SIPF strives to provide protection to mutual fund and securities crowd funding (SCF) investors. Especially for mutual fund investors, this will be a breath of fresh air if there is protection from Indonesia SIPF. Because based on data as of February 2025, mutual fund investors in Indonesia have numbered around 14 million investors.

Then Mr. Narotama also added, as the IPF institution which is relatively the youngest among the other institutions present, Indonesia SIPF still needs a lot of insight to be able to continue to develop to provide optimal protection for capital market investors. So it is hoped that Indonesia SIPF's participation in this forum can have a positive impact on the company.

Thus, this press release is delivered for the public to know.
